

# U-MAS Upgrade to Version 6.09

Upgrade instructions

NETWORK VICTORIA  
UNIVERSITY OF THE THIRD AGE

# U-MAS Version 6.09

This pack contains

1. The key features in this release with description on how they operate and function
2. Steps to upgrade

**The new features will be shown at the Masterclass Wednesday 12 June**

# Why early release

1. Some U3As have been impacted by a server upgrade outside our control. The upgrade caused a couple of issues with the U-MAS operation
2. A bug was found in the 6.08 release where a tutor login did not update the Send Email “Reply To” with the tutor email.

A few other issues originally scheduled for release later this year have been included in this release

# Key items

MySQL database upgrade has impacted some U3As

Fixes include

- Access to U-MAS for Members

- A few CSV reports

Tutor login to U-MAS Core

Select Send Email

The “Reply To” did not insert the tutor email - fixed

For example, Tutor email

<b>Reply-To Email (optional):</b>
joe.blow@gmail.com

# Key items

## **Delete member from course - fleeting emails**

When deleting a member from a course in Reports>Enrolments the emails being sent to the tutor and member fleetingly appear at the top of the screen and disappear. The fix is to delay the message by 5 seconds

## **Reports>Members>Like to Help (classifier 2)**

Column justification fixed

## **Reports>Courses>Courses>Download daily dates calendar CSV fields are incorrect**

Col H should be "Dates" as this column reports the course running dates.

# Key items

## **Tutors at a nominated venue - report / send email**

Show tutors at a specific venue

Reports>Courses>Tutor has a venue pulldown to select a venue to find tutors within the nominated date range

Send email to tutors at a specific venue

Send Email>Enrolments include a venue pulldown to select a venue to find tutors within the nominated date range

# Key items

## **Add (New) Course without a finish date cannot be found**

If a course is added without a finish date it does not display in the course list.  
The finish date is now mandatory

## **Special Interest does not show preferred name**

Reports>Special Interests (Volunteering) does not show the member preferred name in both the screen and the CSV report. Fixed to show preferred/first name

# Key items

## **Courses/Subs start date vs enrolment date**

The Subs start date is used to determine when the subs are displayed. Similar for Courses.

The mouse hover over the Courses/Subs in Member Details has not been changed and still shows the actual 'enrolment date'

Text has been changed in System Settings>Options

was

“Date from which member details are displayed: / This will prevent previous enrolments from displaying”

Changed to

“Date from which member courses are displayed: / This will prevent previous courses/subs from displaying”

# Upgrade Step 1

Login as Admin with member number and password

Membership number or email:

Password:

Login

Check the bottom ribbon on any page

- Confirm version number (the date may be different) -

Version: 6.08 10/04/2024

If you are currently not running Version 6.08 DO NOT PROCEED but contact your support person

# Upgrade Step 2

- Miscellaneous>Upgrade
  - Select Upgrade the programs
  - Message similar to that on right will be displayed
  - Be patient – the upload might take a min or two

It is not necessary to run  
#2 Upgrade database  
changes for this version

If an error is received during this Step, refresh screen using **F5** and, if necessary, try again

## Upgrade

**If instructed to do an upgrade** (to ensure you have the latest version):-

Run step 1 **Upgrade the programs**, then if instructed go to Step 2. **Upgrade Database changes.**

Note: The Web server must have Zip enabled in the PHP settings, which is a default for most ISPs.

1. Upgrade program version: **1. Upgrade the programs** This will look for a zip file on the vendor's website and unzip it.
2. Upgrade Database changes: **2. Upgrade Database changes** This will update any database changes, based on the version.

## DYNAMIC UPDATE SYSTEM

Current version is 6.08. Looking for a new version: <https://members.u3avictoria.com.au/UMAS-UPDATE-PACKAGES/Version.txt> Please wait..

This version is 6.08, so updating to version 6.09 for this date 2024-05-09. Refresh a menu, after completion, to see the new version number.

Version: 6.09

Looking for <https://members.u3avictoria.com.au/UMAS-UPDATE-PACKAGES/MMD-CMS-6.09.zip>

Temp File is /tmp/TmpRfrxab

Dir extract is: /home/customer/www/members.u3avictoria.com.au/public\_html/members

Value of file\_put\_contents is: 44450202

Value in extracting from a zip: 1

PHP with zip support exists. Continuing..

Unzipping /tmp/TmpRfrxab to

/home/customer/www/members.u3avictoria.com.au/public\_html/members Result is 1

Completed. Please check it is running ok.

# Checks to be done

- Core U-MAS
  - Confirm Version: 6.09 appears in the bottom ribbon of any page

Version: 6.09 09/05/2024
